# CareLynx is like no other system on the market

It not only records data, but uses it to provide a **best practice clinical pathway** for staff. This creates a **quality**, standardised level of care across the residential aged care facility, **improves outcomes** and **reduces the cost of care**.

The aged care industry is realising major growth and this will continue into the future. This creates a number of challenges for aged care facilities such as:

- Accreditation sanctions and the financial impact
- Maximising ACFI to ensure financial viability
- Increasing competition and demand by residents for higher standards
- The ability to attract and retain capable staff
- Extend the capability of clinical resources

These challenges are exactly what CareLynx was designed to address. Our inbuilt clinical systems and pathways are an evolution for care management and governance in Aged Care facilities. In effect, we created a system that integrates clinical pathways to support and monitor staff to proactively deliver evidence-based best practice clinical care to residents.

RESIDENT OUTCOMES

- High quality and consistent person-centred care
- Chronic disease management
- Reduced hospitalisation
- Living longer, living better
- Holistic resident care
- Facilitates Customer Choice

CAPACITY

- Directive: improve clinical practice
- Integration with data collection software
- Driving staff efficiency
- Proactive best practice model
- Transparent accountability
- Carer's relationships leveraged into Working-Care-Plans

IMPROVE VIABILITY

- Maximise ACFI funding
- Proven efficient staffing model - significant cost reduction in Clinical Nursing resources
- Significant risk reduction framework
- Improve resident satisfaction

CLINICAL GOVERNANCE

- Risk mitigation
- Builds accountability
- Manuals
- Clinical Practice Pathway
- Monitoring and improves quality of care and service
- Builds staff competence

RESIDENT · STAFF · CLINICAL SYSTEMS · ROI

- CareLynx has integration pathways which allows for API development with other clinical data collection programs. This means bigger facilities can keep your existing system while still gaining the added value that CareLynx delivers.
- The system is scalable from 1 to over 10,000 beds across multiple facilities.

We also offer a CareLynx+ option where we manage remote facilities on your behalf using our highly experienced nurses to ensure a high quality standard is maintained and reducing the risk of sanctions for at-risk sites.
